

Subject: PSA - Annual Fire Hydrant Testing

The Manchester Fire Department will be performing annual fire hydrant flow testing during hours of 9:00 AM until 3:00 PM, Monday thru Friday, beginning on Monday, January 23, 2023.

“With some fire hydrant repairs that have been conducted in the past several weeks, homeowners might have experienced their water being a dingy color. We are hoping that by flushing the system, we will rid the lines of sediment that may have collected”- Fire Chief Ben Williams.

There will also be personnel out over the next several weeks painting the fire hydrants throughout the City.

Please call the Manchester Fire Department for further information at 706-846-2134
